

ENERGY CODE LEADER APPLICATION

2016 STANDARD BEARERS: EXCELLENCE IN ENERGY CODE COMPLIANCE AWARD

APPLICATIONS DUE JULY 15, 2016

ABOUT IMT

Founded in 1996 and based in Washington, D.C., IMT envisions a future in which the social, environmental, and economic value of energy efficiency is realized and all buildings are highly efficient. Such a future requires market transformation, a process of strategic intervention in the market to remove the barriers to broader adoption of energy efficiency.

ABOUT ICC

The International Code Council is a member-focused association. It is dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets choose the International Codes.

The International Codes, or I-Codes, published by ICC, provide minimum safeguards for people at home, at school and in the workplace. The I-Codes are a complete set of comprehensive, coordinated building safety and fire prevention codes. Building codes benefit public safety and support the industry's need for one set of codes without regional limitations.

The Institute for Market Transformation (IMT) and the International Code Council (ICC) will recognize jurisdictions and code officials using strategies that have proved successful in achieving building energy code compliance and energy reduction in a cost-effective manner. Energy code compliance refers to whether a building meets the provisions of the energy code during the phases of design and construction. Winners of the 2015 Standard Bearers Award can be found [here](#).

Award recipients will receive a travel stipend to attend the 2016 ICC Annual Conference and Public Comment Hearings in Kansas City, MO., to be honored at the ICC Awards Luncheon. Winners will also be photographed and featured in a press release sent to national, trade, and local media. Award recipients will be profiled on the IMT and ICC websites and in partner newsletters.

ELIGIBLE ENTRIES—ENERGY CODE LEADER

Any code official who has shown dedication to improving compliance with building energy codes. Activities for improving compliance may include the implementation of unique programs or processes such as education and training programs for industry and staff, or instituting quality assurance procedures. Activities may also include involvement in code development and professional associations, and the promotion of energy codes to local or state elected officials, as well as outreach and assistance to code officials in other jurisdictions.

AWARD CRITERIA

A panel of judges assembled by IMT and ICC will evaluate entries based on:

- Contributions of the individual to improve compliance
- Potential for the individual's activities to be replicated elsewhere
- Length of time the individual has been involved with building energy codes
- Impact the individual has had on their jurisdiction and other locations

DIRECTIONS

Email the completed form to awards@imt.org as a .pdf file. Attach supporting materials as appropriate. **Applications are due July 15, 2016.** IMT may conduct interviews with finalists before selecting award recipients. There is no limit to the length of submissions. Individuals may nominate themselves or be nominated by someone else.

Please direct all questions to awards@imt.org.

APPLICATION

PART 1. BASIC INFORMATION

Jurisdiction:

Applicant's Name, Title:

Phone Number:

Email Address:

List professional licenses or certifications held (if any):

PART 2. NARRATIVE

Please describe how the nominee has contributed to the advancement of building energy code compliance and why you believe they should win the award:

PART 3. SUPPORTING MATERIALS

Please include any supporting materials that will help make the case for the candidate to receive the award.

Supporting materials can include:

- Videos or slides of past presentations
- Local news stories or testimonials
- Photographs
- Campaigns
- Other awards or accolades
